

## AXCESS CANADA NEWS RELEASE

### ARMNET FINANCIAL PRODUCT MANAGEMENT GLOBAL IMAGE LAUNCH FOR WINDOWS 7 OPERATING SYSTEM

**July 5, 2009, Toronto, Ontario:** Access Canada ([www.axcesscanada.com](http://www.axcesscanada.com)) is pleased to announce the release of the newest version of our software solution developed on the latest Microsoft .NET framework. It is also completely enabled to run and be compatible with Windows 7, Microsoft's newest operating system.

In launching this new and improved version we have changed the name of our solution to ARMNET Integrated Financial Management Software. The ARMNET name comes from combining the original ARM product name which is short for "Access Relationship Manager", with the power of the Microsoft's .NET framework to form the product name ARMNET. The solution provides users with an unparalleled customer relationship management experience on the latest software technology solutions.

The new logo identified above will be tied to this new brand name and promoted globally unifying our approach on the international marketplace and providing a fresh image for our clients. Updates to our Access Canada site as well as the sites of our partners in Australia and the US to reflect the recent launch of this new product name will be forthcoming.

For further information on the product improvements with this change or the opportunity to have a demonstration of its collective benefits please feel free to email us at [axcessprosales@axcesscanada.com](mailto:axcessprosales@axcesscanada.com) or contact us directly at 1-705-495-5599.
